ISMS - Information Security Management System Policy

AREEJ VEGETABLE OILS & DERIVATIVES S.A.O.C (AVOD) believes in the importance of continuous improvement and operation of an Information Security Management system relevant to the security risks of the Organization to:

- ensure Business Continuity.
- protect Confidentiality, Integrity and Availability of our information assets.
- make employees alert and responsive to information security issues.
- undertake proactive actions and implement relevant information security policies to prevent security incidents.

The Management of AVOD is committed to:

- the implementation of ISO 27001:2013 to achieve information security goals in conjunction with business goals.
- give importance to the development and enforcement of a corporate culture, which promotes security.
- provide all resources required for the definition and effective implementation of ISO 27001:2013.
- review the effectiveness and suitability of ISO 27001:2013 implementation and take necessary corrective & preventive actions where required.

The main executive goals of AVOD ISMS are:

- to define and implement processes and policies that protect its business assets including implementing security solutions that support secure network infrastructures.
- to ensure efficient business operations and business continuity.
- to track and keep pace with changing requirements of business and changing threat scenarios.
- to implement security solutions that are cost-effective and that afford ease-of-use for meeting the above mentioned goals.

Salem Bin Nasser Al-Bortmany
